

Diving Snorkel SV Dry Flex Silicone

Brand: Apollo

SV Dry Flex Silicone Snorkel

The Apollo SV Dry Flex Silicone Snorkel features a streamlined oval-shaped bored tube and lower flex tube combined to make this snorkel perfect for scuba diving. The lower section flex tube automatically swings out of the way when you are using your scuba diving regulator (Drop Away Style).

The SV Dry Flex snorkel has a Splash-Proof dry guard that virtually eliminates water intake through the top of the tube. Swim through wind and wave spray without interrupting your breathing. If any water enters the snorkel tube it can easily be blown out with the easy purge system's one-way valve with an extra-large self-draining chamber at the bottom of the snorkel tube.

The angled mouthpiece fits comfortably in the mouth for hours of snorkelling fun and is removable if a replacement is necessary.

The Apollo SV Dry Flex Snorkel is also equipped with a Quick-Release Buckle which detaches with a single-hand action. Thus, you can easily separate your mask from the snorkel.

Features:

- Streamlined flexible oval-shaped bore
- Silicone drop away style – great for SCUBA Divers
- Splash guard virtually eliminates water intake from waves and water spray
- Easy purge system with extra-large self-draining chamber
- Quick release buckle detaches with single-handed action
- Super comfortable replaceable orthodontic mouthpiece
- **14 Different Colour variations available.**
