

BIO METAL STEALTH

LOW-MAGNETIC

WORLD'S FIRST
ANTI-REFLECTIVE MASK

Apollo has specifically developed this product to fit the demanding roles of Special Forces Operators worldwide

BIO METAL STEALTH LOW-MAGNETIC

Features:

AR Lens - Anti-Reflective (Reduces surface reflection by up to 90%)

- Reduces the chance of attracting attention caused by lens reflection from sunlight or searchlights while on covert missions.

Angled Lenses

- Angled lenses push any residual reflection downwards rather than straight back at the subject.

Non - Reflective Matt Finished External and internal Silicon Skirt

- Eliminates all reflections both internally and externally.
- Unique shaped silicone skirt brings unparalleled comfort, fit and sealing.
- One size fits 90% of face shapes

Angled lenses direct any residual reflected light, down and away from the subject being viewed.

Matt finished (Aluminium Frame) - Superior Vision

- Thin bridge section between the lenses allows the eye to be centrally located in each lens thereby increasing field of vision dramatically over conventional styles.

Lens Suite - Mask comes standard with AR Lens - others optional

- AR (Anti-Reflective Lens)
- P (Polarized Lens)
- O (Optical Lenses available)
- S (Standard Tempered Glass Lens)

Accessories

- Strap mounted light mount

Supplied in a protective fabric bag.
